

VLAN (Revise)

- Create VLAN
- port assignment
- Trunk

* VLAN 99 is used for management vlan (switch, routers)

R1(config)# int g0/0

R1(config-if)# no shutdown

*** না দিলে Routing কাজ
করবে না! (Cable অব, red থাকবে,
link down)

Giving IP to Switch:

int vlan 1

ip add 192.168.99.2 255.255.255.0

no shutdown
